

Goal Statement - Esraa Abdelmoein

My name is Esraa Abdelmoein. I graduated with a Bachelor's degree in Criminal Law and later transitioned into the field of Information Technology out of my deep passion for computers and technology. I am currently pursuing a diploma in IT Programming at Nova Scotia Community College and have also completed the IT Analyst Program at NPower Canada.

My goal is to build a successful career in the IT industry, focusing on programming and web development. I enjoy designing and developing modern, responsive websites and continuously improving my technical skills. I am open to working either remotely or in an office environment, and I value opportunities that encourage learning and creativity.

I believe that my background in law has helped me develop strong analytical thinking, attention to detail, and problem-solving abilities. Combined with my growing technical skills in languages such as Java, C, HTML, and CSS, I am confident in my ability to contribute meaningfully to any IT team.

I am committed to lifelong learning and look forward to further expanding my knowledge and experience in the technology sector.
